The points for the "Price" criterion will be calculated as follows:

$$\frac{\text{Total gross price in the cheapest tender}}{\text{Total gross price in the examined tender}} \times 100 = \text{LPC}$$

LPC – number of points of the examined tender for the total gross price of the service.

The points for „**Substantive assessment of 3 expert opinions presented**” criterion will be calculated as follows

Substantive assessment of 3 expert opinions presented by the Tenderer (from the last 5 years counted from the date of submission of the offer)	Punctuation
Each expertise will be assessed in 3 areas:	
Adequacy of the expertise (compliance of the expertise with the subject area it concerns)	Min. 1 points Max.5 points
Completeness of the expertise (it contains all the elements related to the subject of the expertise)	Min. 1 points Max.5 points
Topicality of the expertise (is based on current legislation and bibliography)	Min. 1 points Max.5 points

Number of points for 1 expert opinion: number of points obtained for Adequacy + number of points obtained for Completeness + number of points obtained for Topicality

Maximum number of points for 1 expert opinion: 15 points

LPOM – total result obtained - number of points in the examined offer: Substantive assessment

LPOM = Assessment Expertise 1 (Number of points for 1 expert opinion: number of points obtained for Adequacy + number of points obtained for Completeness + number of points obtained for Topicality) + Assessment Expertise 2 (Number of points for 1 expert opinion: number of points obtained for Adequacy + number of points obtained for Completeness + number of points obtained for Topicality) + Assessment Expertise 3 (Number of points for 1 expert opinion: number of points obtained for Adequacy + number of points obtained for Completeness + number of points obtained for Topicality)

LPOM: Maximum number of points: 45 points.

The number of points obtained from the offer (LUP) consists of the sum of the weighted scores Price (LPC) and Experience (LPOM) calculated as follows:

Number of points obtained from the LUP offer = LPC (price) x 30% + LPOM (content-related assessment) x 70%

The offer with the highest total number of points (LUP), will be chosen.
